Education

B.S. Computer Science, Certificate in Software Engineering   2026
University of California, Sacramento

- Committee Chair of the Data Structures and Algorithms Club
- Full-Time Student

Experience

Buzly   October 2022 – January 2023
Software Engineer Intern
React, Javascript, TailwindCSS, MongoDB, Node.js, Git, AWS, Docker, Figma

- Redesigned the client-end dashboard frontend using React, JavaScript, TailwindCSS, and Figma Interface Design which improved dashboard ease-of-use and increased current client satisfaction and new client interest by 60%
- Implemented a functional Event Calendar within the dashboard using Day.js that enabled the user to view upcoming events, edit current events, and add new events

Projects

QR Code Generator
React, Javascript, Tailwind CSS, QRCode.js, Node.js

- The QR Code Generator takes in any website link and generates an active QR Code that, when scanned, directs the user to the site

Drag and Drop Application
HTML, CSS, Javascript

- The Drag and Drop application randomly displays the Top 10 Richest People in an unsorted order and allows the user to drag and drop each individual person into their respective spot on the list
- You can actively check your progress throughout and when each person is in the right spot the game is over and confetti cover the screen
